

GURUDAS COLLEGE  
DEPARTMENT OF ENGLISH  
Internal Examination- 2021  
Paper- CC4/GE4(Gen)

*Instructions: Your answer must be handwritten, covering not more than 1-2, A4 size paper. Use only BLACK/BLUE ink.*

*The cover page must include i) Candidate Name ii) University Roll No. iii) University Registration Number iv) Paper v) Semester vi) Contact No. vii) Email ID (if possible).*

*Clearly scanned copy of the answer in PDF format shall only be acceptable.*

*The subject of the email and pdf file name should be paper-Candidate name-semester, for example: CC4/GE4\_RamSen\_Sem4.*

*In the body of the email also write the following details: i) Candidate Name ii) University Roll No. iii) University Registration Number iv) Paper v) Semester vi) Contact No. vii) Email ID (if possible).*

*Send answer scripts to the following email id: [tanmoy.english@gurudas.education](mailto:tanmoy.english@gurudas.education) ]*

**Attempt *any two* of the following questions:**

**5x2**

1. Briefly discuss the importance of prewriting in the writing process.
2. What is academic referencing? Why do we cite and refer in academic writing?
3. Write an essay on Importance of Travel in Crime fiction.
4. Write a summary and give a suitable title for the following passage.

The Commonwealth Scientific and Industrial Research Organization (CSIRO) is Australia's main scientific body. They conducted a research on the toxicity of the interior of new cars over a period of two years. Steve Brown, the head of the CSIRO's air quality control research unit draws a parallel between the home and the car. He says, "Just as air inside our homes and workplaces is often much more polluted than the air outside, so sitting in your new car can expose you to levels of toxic emissions that are many times beyond health guideline goals."

The toxic emissions contain many chemicals and they include for example, benzene, acetone, ethylbenzene, and xylene isomers. The effects of each are far from benign. Benzene is a cancer-causing agent, acetone is a mucosal irritant, ethylbenzene is a systemic toxic agent, and xylene isomers is a foetal development toxic agent.

So what are the precautions that new car owners have to take? Brown pointed out in a statement that the remedy was simple. "To avoid some exposure to this toxic cocktail, people who buy new cars should make sure that there is plenty of outside air entering the vehicle while they drive it for at least 6 months." The implications are clear. Drivers should refrain from using their car air-conditioners and drive with their windows rolled down.
